

6.6 Management of Poisonous Plants Fungi Policy

Policy Statement

The service understands the need to maintain a healthy and safe environment for children and educators whilst at the same time valuing the aesthetic appeal of the natural environment. A number of plants and fungi are known to be poisonous to people and may pose significant risk if consumed, or in some cases handled. The service shall endeavour to ensure the environment is free of potentially poisonous plants and fungi.

Procedures

The service shall maintain a current copy of the Queensland Government Resource "Plants and fungi poisonous to people in Queensland" produced by the Queensland Health Environment Protection Agency. This resource will be made accessible to and discussed with all members of staff and management. This resource is available at http://www.health.qld.gov.au/poisonsinformationcentre/plants_fungi/default.asp

The service shall keep in a visually accessible location the number for the Poisons Information Centre 13 11 26.

The service environment will be maintained free from poisonous plants and fungi through:

- Negotiating with land owners, particularly where the space is shared, the removal and planting of suitable trees, plants and shrubs
- Regularly checking the service environment for growth of potentially poisonous plants, in particular weeds and fungi; and
- Immediately removing any recognised poisonous plants from the service environment using appropriate gardening gloves and tools and disposing of these in a safe manner.
